File sizes may differ on different computers.

Email 1/2 – Documentation.

These are filesize-optimized PDFs, with vector-image replicas of the original raster figures and other internal optimizations that preserve the exact appearance of the original file when printed.¹ The purpose was to get the files small enough to email to whistleblower resources with size-constrained inboxes. The original electronic versions are in [https://5usc2302.github.io/risk/Full documentation/Original versions](https://5usc2302.github.io/risk/Full%20documentation/Original%20versions).

I crossed out the draft labels and wrote in the finalization date above the first label in each major part or volume. In most cases that was October 2, 2015, when the Secretary published the SNRA findings with FEMA's updated doctrine (https://www.fema.gov/sites/default/files/2020-06/national_preparedness_goal_2nd_edition.pdf).

In case email 1/2 doesn't get to your inbox [it is very large], the attachments listed below are also at <https://5usc2302.github.io/risk/>.

Email 2/2 – The pandemic, Maria's deaths, and future risks. Context and justification for lawful disclosure.

Context packet sent July 4 and 20, with additions and changes documented in the email and the last attached zipfile (8.5.6). The 2015 White House-edited version of the SNRA findings document is also included here, in the last attached zipfile (8.5.2). Other than the one page in the attachment above it (8.5.1) this wasn't one of the documents I sent in July, but since it's not part of the SNRA documentation I didn't know where else to put it.

These attachments are also in [https://5usc2302.github.io/risk/5%20U.S.C.%202302 justification/20220425c/](https://5usc2302.github.io/risk/5%20U.S.C.%202302%20justification/20220425c/).
